ParkPGH

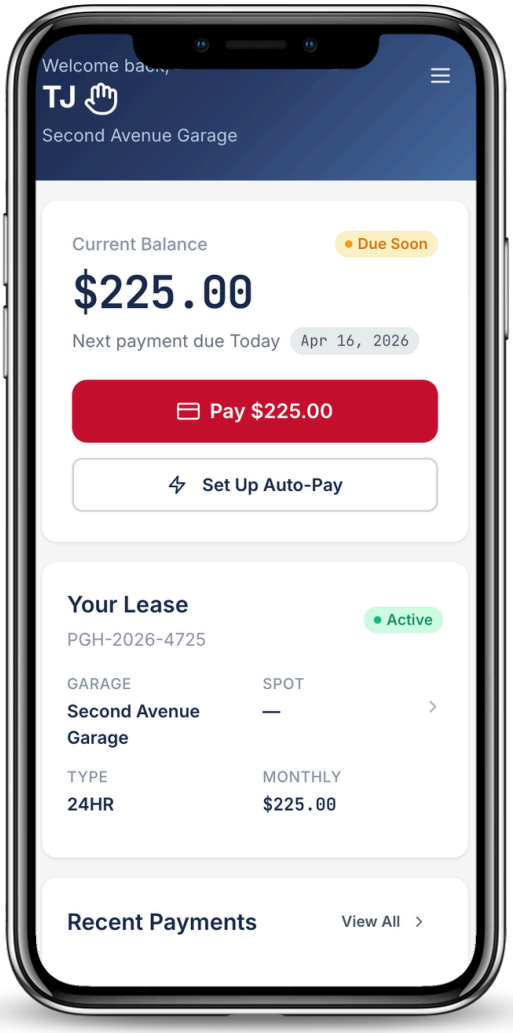
PPA garage lease management and payment proposal

Consumer Experience Gap

Today's lease experience creates unnecessary friction for both customers and staff.

- Payments are easy to miss
- Lease details are hard to access
- Customers must log in (if they have an account number), call, or visit in person to make payments, renew their lease or update PPA.
- Staff lack real-time visibility into delinquent revenue; no communication

This results in missed payments, frustrated customers, and manual overhead



Solution Overview

Features include:

- SMS and email reminders
- One-click payment links
- Auto-pay enrollment
- Passwordless logins & minimal user interaction
- Real-time dashboards for admin
- No consumer downloading or barriers
- Integration with current systems including PayExpress

ParkPGH shifts the model from reactive to proactive. Digitizing the leasing experience will allow for steady revenue and inventory management of leases. Renewals, applications, payments and administrative monitoring will create a frictionless experience for both consumers and managers.

Admin Experience

Instead of relying on manual processes, delayed payments, and fragmented information, administrators gain a single view of leases, inventory, and revenue. Payments become predictable through automation. Lease activity becomes transparent. Communication becomes immediate.

The result is simple: fewer missed payments, less administrative overhead, and a system that keeps both sides aligned.

Real-Time Inventory Visibility

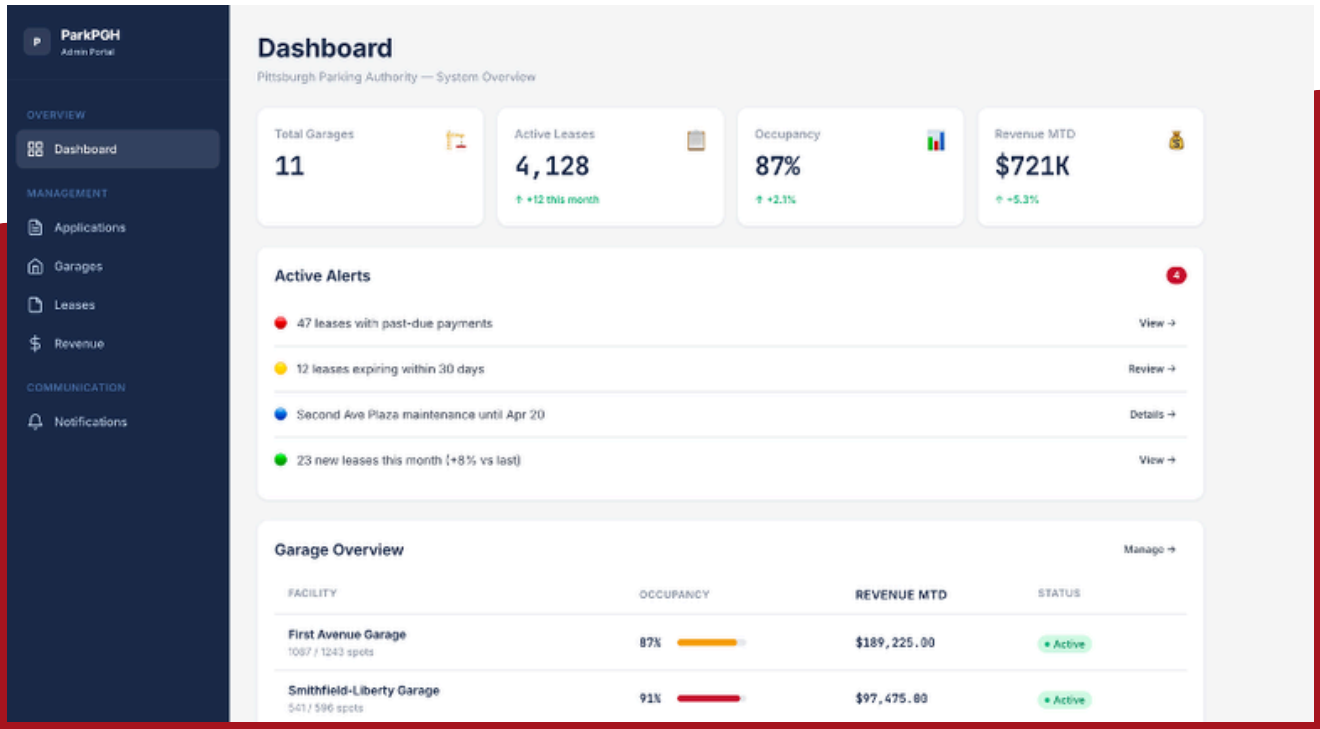
- Review and approve lease requests in one place
- Access uploaded documents (residency, verification, etc.) instantly
- Maintain a clear, digital record of every lease and applicant

Automated Payments & Collection

- Eliminate in-person payment handling
- Enable auto-pay and digital payments for all leaseholders
- Reduce missed payments through automated reminders

Direct Communication

- Send targeted notifications to leaseholders
- Communicate maintenance, closures, or updates instantly

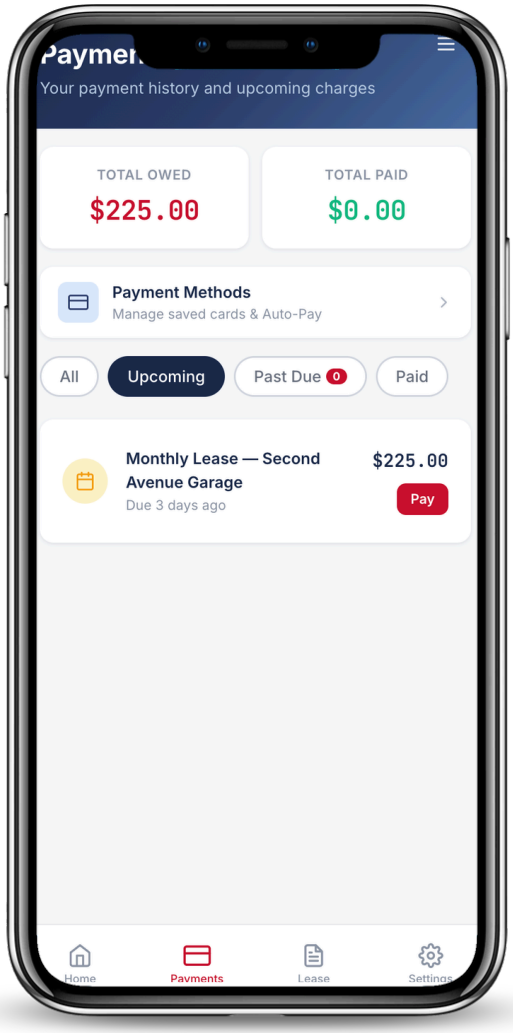


Consumer Experience

Today, it's easy to lose track of a parking lease. You don't see your agreement. You don't get clear reminders. Payments slip, and months later you're facing a large, unexpected balance.

ParkPGH replaces that with a system that keeps you current automatically and gives you full visibility when you need it.

Set it once. Stay in control without thinking about it.



No App, No Passwords

- No app download required
- Passwordless login via secure links
- Access your account instantly from any device

Effortless Payment

- Pay in seconds through a secure link
- Enroll in auto-pay once and stay current automatically
- Receive instant confirmations and receipts

Simple Lease Management

- Apply for leases digitally
- Upload required documents (e.g., residency verification)
- Renew or update your lease without calling or visiting an office
